- A fallen phrase puzzle is a puzzle where all the letters have fallen to the bottom. However, they got mixed up on their way down, but remain in the same column.
- The first step is to fill in any blank spaces with just one letter underneath.
- Next, figure the two word options.
- Now, just use trial and error to keep filling in the blanks until you get a finished puzzle.
- We've used a classic bit of Saints commentary to try and make things easier 😊
